

JUSTIN OLIVER LEE

WEB DEVELOPER

OBJECTIVE

Seeking a position in web development where I use and expand my knowledge of front-end languages and frameworks; specifically Javascript and the React framework. Along with ways to organize and participate in events to learn from others and mentor those who are new in the local developer community.

SKILLS

- Front-End and Back-End languages like HTML, CSS, JavaScript, Typescript, C#, and SQL.
- Front-End and Back-End frameworks like React, React Native, Node, and .Net.
- State and database management with Redux, MySQL, and Postgres.
- Git for version control, familiar with RESTful and CRUD API architecture.
- CSS preprocessors, libraries, and frameworks like SASS, LESS, Style Components, Material UI, Bootstrap, and Bulma.
- Business tools and techniques like the Microsoft Office Suit along with Operations and Inventory Management.
